The lab is not fun beacuse we're learning commands too fast.

Gregg is great. You should pay him.

- discussion section would be helpful in addition to lab
- homework assignments really time consuming

The TA was excellent. HW takes an extremely long time. STATA should be more accessible to students. There should be a discount for UCLA students.

Gregg is a very good T.A. He knows the material and is good at explaining things. The lab section itself, however, I did not like having for this class because the material covered in lab on STATA is not tested in the tests, I could have benefited from a regular disc section for this course to better prepare for the tests.

It's better to have a regular TA section, not just to teach us how to use STATA, which is useless

I really enjoyed coming to section because you teach the material in an understandable manner. I think you should continue to focus on why we use all the different regression test because it is difficult if we don't understand the concept. I think it is good how you also use the white board and would like a little more integration with how to do the problems by hand because the tests are written.

- Having the dofile prepared saved a lot of time during section, and was a valuable resource for codes for homework

Greg is a great TA that knows a lot about econometrics. He went slowly through the material and made sure everyone understood it. Great job overall!

Bring back regular TA sections we don't even  
get graded or tested on coding/stata screw lab  
focus more on material taught in class

Great job helping us learn STATA.  
I thought you did a great job with the examples to help us learn the material.  
Your office hours were also really helpful.

Strengths:

- I can understand you fairly well

Weakness:

- You go abit slow! sometimes, you can speed up.

Course:

- DIS lab has no real integration to the course/class!
- WE can't really ask you an about theory since you teach the code...

- not enough time to actually learn the program/coding for Heta
- could not finish problems, but probably professor's fault.

Strengths -

- knew material well, and was able to explain things very well

- it was very helpful to do problems from the book in class, and when the do-files were prepared in advance

Weaknesses

it was
