Helpful, all things considered. The main problems in the course stem from the prof w/ the TAs trying their best to steer us on course.

Greg knows exactly what he is talking about and is always willing to help.

The section was always prepared for well and presented clearly.

If the Professor had given some kind of indication how the finals would look like, I feel the section material could be made more suitable to how we are tested.

Very smart, knowledgeable TA.

Explains material clearly - is helpful and will create time for his students

Suggestion:

When writing on the board: try to write more in detail while speaking

That way students can take note of what is said because it is important material

(students can go back to notes and understand better)

Greg's ability to convey concepts and integrate real examples with the course material is superb. His ability to communicate and methodically go through problems with great organization made this section very useful and helpful.

Discussions are really helpful. TA helps us to finish assignment that are not presented in lecture. He gave us a clear guideline as to what we should know.

Greg is an excellent TA. He is very knowledgeable about economics and explains it well. The sections were poorly integrated with lectures because what we learn in lecture is purely about specific cases and very abstract. What we went over in sections was hardcore economic models. Sections were MUCH better than lectures. Greg explained the material coherently and made it enjoyable. I know that the professor will probably not use any of this material on the final exam but the sections were by FAR the best part of the course and still very worth my time. I would recommend Greg to anyone thinking about taking this course.
